Title	*Smart Travel Planner*
App Name	*TripWise*
Problem Statement	*Travel planning often requires users to search across multiple platforms for destinations, attractions, accommodation, transportation, food recommendations, prices, and budgets. This makes planning time-consuming and difficult, especially when users want to organize all their travel information in one place. TripWise aims to provide a centralized mobile platform where users can explore destinations, create personalized trips, organize itineraries, manage their travel budget, and save places for future reference.*
Abstract	***TripWise – Smart Travel Planner*** *is a mobile application designed to simplify the travel planning process. The application allows users to explore destinations, view destination information, save places, create trips, organize itineraries, and manage their travel budgets. Users can specify their travel preferences, number of travellers, travel dates, and preferred currency. The application is designed to use online travel information and APIs for updated destination, weather, pricing, and place information, while maintaining local data for reliable offline access. Future development will integrate AI for personalized destination recommendations, itinerary generation, itinerary optimization, and budget optimization.*
Target Users	*Students and young travellers ,Individual travellers ,Couples and families ,Users planning domestic or international trips ,Budget-conscious travellers Users who want their itinerary and budget organized in one application*
Planned Core Features	***Destination Exploration*** *– Search and explore Asian destinations with destination-specific information.* ***Personalized Trip Planning*** *– Create trips based on dates, travellers, preferences, and destinations. ,****Itinerary Management*** *– Organize activities and places day-by-day. ,****Budget Planning & Tracking*** *– Enter a total budget and allocate spending across transportation, accommodation, food, activities, etc. ,****Saved Places*** *– Save destinations, attractions, restaurants, and other places for future trips.*

Mobile Application Development – CA1: Review 2
UI/UX Design Review

Milestone: Wireframes, mockups, and visual design language

Section	Details
Group Number	*20*
Team Members	*Ruksar Khatun 25MCAR0115* *Sahil Dcunha 25MCAR0117* *Yashas B Reddy 25MCAR0231*
Title	*Smart Travel Planner*
App Name	*TripWise*
Screens Designed	*Welcome / Splash ,Travel Introduction Slider ,Sign Up ,Login,Travel Preferences ,Home Dashboard ,Explore Destinations ,Destination Details ,Saved Places ,Create Trip ,Itinerary ,Activity / Place Details ,Trip Budget ,Trip Summary ,My Trips ,Trip Overview ,Profile ,Edit Profile ,Settings ,Current Trip / Day View*
Wireframe / Mockup Tool	*Android Studio – Jetpack Compose*
Colour Palette & Typography	*Dusk Blue – #26538D* *Azure Mist – #F0FFFF* *Sea Blue – #4BAFC0* *Sea Salt – #8BAF9D*
Design Consistency Notes	*The application maintains consistent colours, typography, button styles, card layouts, spacing, icons, and navigation patterns across screens. Rounded components and clear visual hierarchy are used to improve readability. Interactive elements are visually distinguishable, while sufficient contrast and consistent spacing improve accessibility and usability.*
Layout & Visual Balance	*The interface uses consistent padding, alignment, spacing, and card-based layouts. Important information such as destination names, images, prices, and primary actions receives greater visual emphasis. Content is organized into scannable sections to prevent information overload on mobile screens.*

Mobile Application Development – CA1: Review 3

Development & Responsiveness Review

Milestone: Core build progress and responsive layout implementation

Section	Details
Group Number	*20*
Team Members	*Ruksar Khatun 25MCAR0115* *Sahil Dcunha 25MCAR0117* *Yashas B Reddy 25MCAR0231*
Title	*Smart Travel Planner*
App Name	*TripWise*
Features Implemented	*User registration and login interface , Travel preference selection , Destination exploration ,Destination search and selection , Destination details , Save/remove destinations ,Create trip,Select travel dates and number of travellers ,Day-wise itinerary ,Add/edit/delete itinerary activities , Trip budget input and allocation , Trip summary , My Trips, Profile and Edit Profile , Currency selection ,Light/Dark theme support ,Persistent user and trip information ,Responsive Jetpack Compose layouts*
Tech Stack Used	***Frontend / Application:*** *Kotlin ,Android Studio ,Jetpack Compose ,Material 3* ***Architecture / Libraries:*** *Navigation Compose ,ViewModel ,DataStore / local persistence ,Retrofit ,OkHttp*
Devices / Screen Sizes Tested	*Pixel 7 emulator ,Android 15 ,Portrait orientation*
Responsive Design Approach	*The application uses Jetpack Compose's responsive layout system with flexible sizing, adaptive arrangements, scrollable content, and reusable components. Layouts avoid fixed screen dimensions so that content can adapt to different Android phone screen sizes and orientations.*
Known Issues / Bugs	*Some destination data and external API integration require further implementation. Destination information and live travel data need further integration. Profile data synchronization across all screens requires further testing. Some destination images need verification and replacement with appropriate real images. Currency consistency across all screens requires final testing.*

UX, Navigation & Usability Testing

Milestone: User flow, interactivity, and usability feedback

Section	Details
Group Number	*20*
Team Members	*Ruksar Khatun 25MCAR0115* *Sahil Dcunha 25MCAR0117* *Yashas B Reddy 25MCAR0231*
Title	*Smart Travel Planner*
App Name	*TripWise*
Navigation Flow Summary	***Welcome → Travel Introduction → Sign Up / Login → Travel Preferences → Home*** *From Home:* ***Home → Explore → Destination Details → Save / Add to Trip*** *Trip planning:* ***Destination → Create Trip → Itinerary → Budget → Trip Summary → My Trips*** *Supporting navigation:* ***Home → Saved Places*** ***Home → Profile → Edit Profile / Settings***
Interactive Components Used	*Buttons , Text fields ,Password fields , Search bar ,Destination cards ,Image cards , Save/favourite buttons , Dropdown menus , Currency selector ,Date picker ,Traveller counter ,Chips ,Tabs ,Bottom navigation , Dialogs ,Sliders ,Checkboxes/toggles ,Editable budget fields ,Scrollable lists ,Add/edit/delete itinerary controls*
Usability Testing Method	*The application was tested through peer testing using sample users from the student group. Users were asked to perform common tasks such as signing up, selecting travel preferences, exploring destinations, saving places, creating a trip, adding itinerary activities, and managing a travel budget. The team observed navigation, interaction, readability, and ease of completing each task.*
Usability Feedback Received	*Users found the destination cards and visual layout easy to understand. Feedback suggested improving the availability of destination-specific information, making budget calculations clearer, maintaining consistent currency throughout the application, and improving synchronization of user profile information across screens.*
Navigation Improvements Planned	*Improve consistency between Profile and Home user information. Improve destination-specific information. Improve API-based real-time information. Improve loading and offline states. Ensure currency selection is reflected throughout the application. , Improve destination search and filtering.*
Add-ons as per Remarks

Team Members	*Ruksar Khatun 25MCAR0115* *Sahil Dcunha 25MCAR0117* *Yashas B Reddy 25MCAR0231*
Title	*Smart Travel Planner*
App Name	*TripWise*
Deployment Details	***Platform:*** *Android* ***Development Environment:*** *Android Studio* ***Technology:*** *Kotlin + Jetpack Compose* ***Deployment:*** *Android APK / Emulator demonstration*
Final Feature Summary	*TripWise is a smart travel planning mobile application that allows users to explore destinations, view destination information, save places, create and manage trips, organize day-wise itineraries, and plan and track travel budgets. The application supports user preferences, profile management, currency selection, responsive layouts, and theme customization. Destination and travel information can be connected to online services for updated information, while local data provides reliable application functionality. The architecture is designed to support future AI-based destination recommendations, itinerary generation, itinerary optimization, and budget optimization.*
Demo Notes	*1. The **Welcome Screen** introduces TripWise and explains its purpose as a smart travel planning application.* *2. The **Sign Up/Login Screen** allows users to create an account or log in to access the application.* *3. The **Travel Preferences Screen** allows users to select their travel interests, preferred currency, and other personal travel preferences.* *4. The **Home Screen** displays personalized travel options based on the user's preferences.* *5. The **Explore Screen** allows users to search and browse different Asian destinations.* *6. The **Destination Details Screen** displays the selected destination's image, description, attractions, activities, local food, accommodation, transportation, ratings, and pricing information.* *7. The **Save Place Screen** allows users to save destinations or places and access them later through Saved Places.* *8. The **Create Trip Screen** allows users to select a destination, travel dates, and number of travellers.* *9. The **Budget Screen** allows users to enter their total trip budget and allocate it across different categories.* *10. The **Itinerary Screen** allows users to view and organize their day-wise travel plans and activities.* *11. The **Trip Summary Screen** provides an overview of the selected destination, travel dates, number of travellers, itinerary, and budget.* *12. The **My Trips Screen** allows users to view and manage their created trips.* *13. The **Profile Screen** displays the user's personal information and allows them to edit their profile details.* *14. The **Settings Screen** allows users to change their preferred currency and switch between Light and Dark Mode.*
